BY ANDREW SKOCH

NEON Layer Styles

## Hello! Thank you so much for purchase!

My name is Andrew Skoch. I'm graphic designer and I'm making super easy to use social media templates, typography mockups and Photoshop actions. Please check my portfolio on GRAPHICRIVER and ELEMENTS

If you need any help please feel free to contact me through the contact form on **MY PAGE** or via email: **andrewsko490@gmail.com**

I will be happy for your comments and any feedback. It's always cool to see how my actions and mockups are used. So feel free to contact and show me your work.

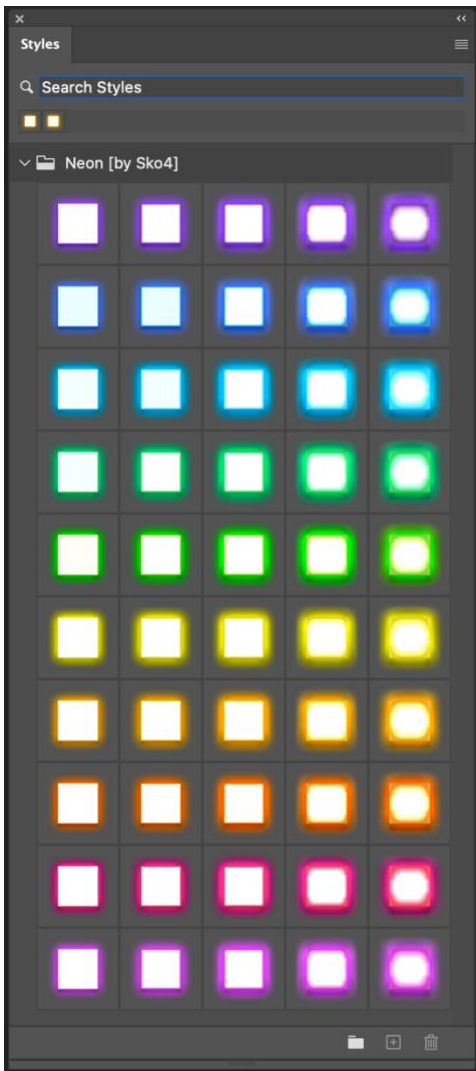

Let's become friends!

How to install layer styles

1.   Find **.ASL** file in .zip folder
2.   The quickest way to install your layer styles
Just drag this **.ASL** file directly into your Photoshop window.

3.   Another method
In your menu bar, go to Edit > Presets > Preset Manager, select Styles from the dropdown menu, and then add your styles using the "Load" button and selecting your .ASL file.
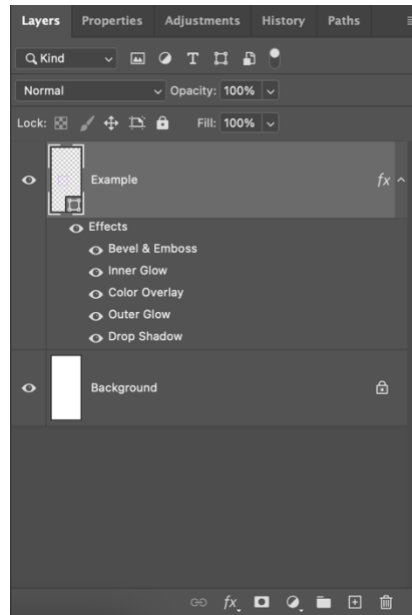

4. Create your text, shape or paste logo

Works with any layers: Text layer | Vector shape | Pixel layer | Smart object | Folder groups

5. Go to the Styles panel

If the Styles panel is not visible, go to "Window", then click "Styles" in the dropdown.

With needed layer selected click on style in Style panel

All effects will be applied in the moment

Important tips:
You cannot apply a style to a layer that is locked. If you find that your style is not working, check to make sure the layer is not locked.

I'll help you with pleasure!
